

Summary

30 years of experience with a business-first mindset, designing, scaling, and delivering data-driven products across energy, healthcare, higher education, human resources, and transportation. Known for architecting resilient platforms, facilitating cross-functional delivery, and improving operational efficiency through maintainable system design, Agile practices, CI/CD, and AI-assisted development. Grounded in continuous feedback and lean development, I solve complex problems with simple, sustainable solutions that drive innovation, support scalable growth, and strengthen business continuity.

Technical Skills and Tools

- C#, .NET (API, MVC), CQRS, EF Code First, Hangfire, JSON, React (Vite, CRA, RTK, Redux), Angular, HTML, CSS, JavaScript, AG Grid, Ant Design, Bootstrap, T-SQL, OAuth, JWT, PING, Auth0, Azure B2C
- Azure (App Services, Function Apps, Blob Storage, Service Bus, Event Grid, Application Insights, Microsoft Foundry), MSSQL, SSMS, SSIS, SSRS, MS Excel (Model Design/Decision Analysis)
- Integrations with DocuSign, Airtable, Procore, Avetta, Qmerit, Dynamics, Salesforce, Workday, Epicor, Trinisys Convergence, Qlik Sense, Tableau, Akamai, CloudFlare, SendGrid, RayGun
- Copilot, Cursor, VS Code, Visual Studio, Postman, Git, GitHub Actions, Azure DevOps, TFS, CI/CD
- Jira, Trello, Agile, Scrum, MVP, Lean, Pareto, Continuous Delivery/Feedback, Pair Programming

Professional Experience

Senior Developer / Architect

April 2019 - May 2026

Schneider Electric - Franklin, TN

- Designed and delivered an integrated, data-driven full-stack platform (React SPA, AG Grid, .NET REST APIs, C#, EF, and MSSQL) on Azure using App Services, Function Apps, Service Bus, Event Grid, and Hangfire to support microservices and scalability. Secured with PING, OAuth, OIDC, and JWT.
- Implemented data integration workflows using AI/OCR solutions (Microsoft Foundry, Document Intelligence), enabling real-time structured data processing and enhanced extraction accuracy.
- Optimized business operational workflows by integrating with third-party solutions including DocuSign, Airtable, Procore, Avetta, Dynamics SQL, and Tableau SQL.
- Facilitated technical delivery in a distributed, cross-functional team of 8-12, internal + nearshore Acklen Avenue partner. Worked closely with internal PO, Analyst, and Stakeholders for high-velocity delivery. Ensured business-first outcomes through hours of weekly backlog refinement, mutual code ownership, collaborative development, and lean Agile practices.
- Collaborative four-year shift towards AI-assisted development, integrating tools like Copilot, Cursor, and Lovable into daily design, coding, peer reviews, and delivery workflows.

Senior Developer / Manager

January 2010 - March 2019

Quorum Health Resources - Brentwood, TN

- Architected and developed a full suite of .NET applications (Angular, React, MVC, WebForms, SQL Server), eventually leading a migration to Azure while maintaining complex data integrations across CRM (Salesforce, Dynamics), Accounting (Epicor, Workday), and hospital pipelines.
- Delivered actionable BI insights using SQL analysis, SSRS reporting, and Qlik Sense dashboards.

- Modernized DevOps by migrating on-prem TFS to Git with automated CI/CD in Azure DevOps.
- Partnered with stakeholders and cross-functional roles (PO, PM, BA, QA, BI) to deliver solutions while aligning technical architecture with business goals and delivery milestones.
- Drove team agility by onboarding new members across diverse disciplines and providing cross-functional coverage (VP, PO, PM, BA, QA) to ensure project continuity.

Application Developer

November 2008 - December 2009

EFC Systems - Nashville, TN

- VB.NET application development (Employee Benefits and Student Information System)

Adjunct Instructor

August 2009 - December 2009

Middle Tennessee State University - Murfreesboro, TN

- INFS 4300 - Security Assurance and Information Systems Auditing

Graduate Assistant

2007 - 2008

Middle Tennessee State University - Murfreesboro, TN

- Facilitated business statistics labs and mentored CIS student web development senior projects.

Information Systems Specialist

2000 - 2007

University of Arkansas Human Resources - Fayetteville, AR

- Streamlined campus-wide HR processes through full-stack development (ASP.NET, ASP, VB.NET, SQL Server, and MS Access), laying the foundation for reporting and regulatory compliance.

Information Systems Specialist

1996 - 2000

Prime, Inc. - Springfield, MO

- Developed integration software bridging client-server PC systems to AS400

Education

Master of Science, Information Systems

2008

Middle Tennessee State University - Murfreesboro, TN

Bachelor of Science, Information Systems

2002

John Brown University - Siloam Springs, AR
